

Deerfield Encounter Capture System

V1.2 Enhancements

- **Export to Excel** Option has been added to “Service Reports”. This option exports a .xlsx file to your downloads folder
- **Last Upload Date** per company has been added to the home dashboard screen. This shows the last date of services imported per company
- **Service Reports Filter** have been added to all columns within the Service Reports Section.
- **Log Failed Text Message** – Clicking on the event under “Service Reports” will now show “Undeliverable” in the Logs if the text message failed to send to recipient.

V1.1 Enhancements

- **Max attempt** setting has been added under Company>select company>edit settings. Text messages for service entries in “Pending Signature” will be excluded for SMS when the “SMS Count” >= than “Max Attempt”
- **Text Warning Value** setting has been added under Company>select company>edit settings. Service entries “SMS Count” that is >= this value, will populate the Text Warning widget on the dashboard.
- **Text Warning Widget** has been added to the dashboard interface. The setting for this app can be located under Company > Select your company>Edit settings.
- **Downloads** section has been split into 3 parts:
 - o Ready to download – Status filtered to “Ready to download”
 - o Downloaded – Status filtered to “Downloaded”
 - o Denied Ready to download – Status filtered to “Denied Ready to download”
- **Exclude from SMS** – Located in Service Reports. Setting this value to “True” will exclude service entry from SMS. Setting to “False” will include service entry in SMS. Setting defaults to null or false (Will include in SMS) upon import.
- **Exclusion Reason** - Located in Service Reports. Text box for reason why “Exclude from SMS” was set to True
